

# SANTA'S REINDEER ROUND-UP CLUES!

**Help! Santa's reindeer meandered off to the various parks in Eau Claire. Help Santa find his reindeer before Christmas by venturing out to our parks and following the riddles to find each one of them!**

-  Eau Claire is the professional baseball starting place for a person known to really 'Hammer' a baseball a long way. **DASHER** really likes baseball and wanted to learn all about Eau Claire's baseball history. If you can find where this history is recognized you'll see Dasher there taking it all in.
-  **DANCER** was last seen heading Northwest where he found one of Eau Claire's hidden gems of trails and nature. Where four trails converge to overlook the river, you'll find a piece of "heaven" at stop number \_\_\_\_.
-  Simon says, FORE! Look out for flying discs. **PRANCER** hoped to find some snacks in one of the cages; but instead found some fun that would last through the ages.
-  **VIXEN** got tired out from a summer of swimming and playing baseball. He needed some rest in a quiet, shady place to recharge before the big night. Follow the wide trail from where little ones play ball on the way to where they swim with their friends. At a quiet crossroads in the pines is where you might find a sleepy Vixen.
-  Take the stairway to heaven through the "pines" and you will find **COMET** near the stars playing with the snowboarders.
-  **CUPID** will be playing reindeer games with his furry friends where the "sun" shines brightly in the north. You will find him where firemen extinguish fire and dogs extinguish their thirst.
-  **DONNER** was last seen enjoying the views in one of Eau Claire's most beautiful in-town spots. Follow the cascading streams down the hill to the pond with two islands in the middle. This pond is right next to a bigger pond, actually a lake named after a celestial body. Find this beautiful spot and you'll be taking in the scenery with Donner.
-  **BLITZEN** has been working out in preparation for the long journey on Christmas Eve. Walk along the river trail and exercise with him on one of nine pieces of fitness equipment.
-  **RUDOLPH** meandered through this park to find a place two rivers converge. His curiosity was inspired, "Ingrain"ed with the art. As he spied through its hole, risen from the ashes, he views a spot where music can be heard.
